About Your Virtual Booth

As a participating exhibitor, each company is given the ability to create and maintain its own unique "Virtual booth", containing the information and hotlinks it feels are important to share with visitors to the IBS website.

Virtual booths are integrated into the powerful search systems used by visitors seeking information about the latest products and services found at the IBS. Visitors who search the IBS database of companies and products can click on an exhibitor's virtual booth to access the valuable "additional" information provided by each exhibiting company. Virtual booths can be customized to contain important contact information, product information, information about show specials, press releases and much more.

Each virtual booth can present personalized marketing and sales information that is completely controlled and maintained by each exhibiting company. It is a powerful tool designed to maintain a year-round online presence that 'complements' your physical booth at the show.
